

PIPE HDPE PLASTALENE PN16 – SDR11 – PE100

PRODUCT DESCRIPTION

A reliable supply of potable water is the key to a healthy life. Our PE pipe systems guarantee safe **drinking water distribution** of pure water with top quality.

The right choice of material for potable water pipes is essential for a safe drinking water network. Therefore **HDPE** is the preferred choice of material:

- High chemical inertness: resistant to corrosion
- Resistant to hammering: long service life
- Resistant to wear
- Absorbs stresses caused by soil movement
- Flexible and bendable when laying a difficult pipeline

Pipelife offers **BENOR**-approved pressure pipes made of HDPE (PE100 or PE80) with the **Hydrocheck** certificate and in compliance with **Belgaqua** regulations.

You can weld the HDPE pipes by using mirror welding or electrofusion. At Pipelife, you will find a wide range of fittings.
