

PRAGMA IT OD SN8 GREEN WITH GEOTEXTILE FW1 80

PRODUCT DESCRIPTION

Pragma IT pipes are designed to infiltrate and transport rainwater at the same time.

Out of our production, they are fitted with an infiltration fabric.

The pipes are applicable in many projects such as roads, squares and railways. They are also used in the construction of airports, sports facilities or other buildings.

The infiltration pipes are made of polypropylene (PP) and comply with standard EN13476-3.

Together with the fittings from the Pragma range, Pipelife offers you a complete assortment you need for the realisation of your infiltration. The system of perforated pipes is wrapped with a **BENOR**-approved, **woven geotextile**. The geotextile **type 5.3** is also compliant with the requirements of **PTV829**.

The Pragma IT pipe has a double wall. The outside is corrugated, while the inside is smooth.

The holes, through which the water can infiltrate into the soil, are divided over the entire circumference of the pipe. (360°)

Material: PP

Color: Green (RAL 6024)

Stiffness class: SN8

Connection 1: Socket

Connection 2: Spigot

O33
